

Systems Training

September 27–29, 2005

Siemens is offering a Systems Training Course for the Marc NX and ACTRA software products. Come see the latest features and new training tools!

What is Systems Training?

The Marc NX and ACTRA Systems training course is the perfect opportunity to train new hires and clients, as well as introducing the latest features and newest training tools to the veteran user. Have the opportunity to meet with top trainers and experts in the traffic control systems operations. Topics covered will include ACTRA and Marc NX training with the latest version and features planned for the latest 4.0 release. Preview new features such as EVCOMM, DMS, updated graphics package, Laptop Conversion and enhanced Installation. See the latest training tools developed by Siemens with interactive demonstrations and how to use them.

What to bring:

The systems training course will be designed with full hands-on instruction. Users are encouraged to bring their own laptop to follow along with the instructors.

Systems Training Course will include:

- Updated software CDs of the latest release for all licensed users.
- Installation Guide
- Training package CD and updated materials including SEPAC training.
- Lunches on Tuesday, Wednesday, and Thursday. Dinner provided Tuesday evening.

When:
